

March 31, 2009

OAK Management, Inc. has received a Cost Plus Fixed Fee Task Order from the Naval Surface Warfare Center, Carderock Division (NSWC/CD), Philadelphia for up to \$13.6 million, if all options are exercised, to provide specialized engineering and technical services to assist NSWC/CD for the installation of Ship's Damage Control, Damage Control Automation and Ship Control Systems. This order was received under the company's Seaport-e contract, N00178-04-D-4094.

AMSEC, LLC; CDI Marine Co.; Computer Sciences Corporation; Delphinus Engineering, Inc.; General Dynamics Information Technology, Inc.; and Reliability and Performance Technologies, LLC will assist OAK Management in supporting the effort.

Mr. John O'Mara, Vice President and Program Director of OAK Management's Engineering Technology Directorate stated, "We are very excited by the opportunity to support NSWC/CD in the development and deployment of these critical Damage Control and Ship Control Technologies. OAK Management and our Team Members have supported similar efforts in the past, and the ability to manage and coordinate these activities under a common umbrella will allow the US Navy to realize the advantages of a coordinated team effort."

OAK Management, Inc. has provided program management, systems engineering and software development services to Federal government and commercial clients since 1981. The company's client base includes project offices in the Department of Defense, Department of Commerce, and commercial shipbuilding industries. Our specific capabilities include engineering and technical support services, software application and database development, mechanical and electrical engineering, naval architecture and associated acquisition program management support. OAK Management's innovative solutions support our clients in engineering disciplines from concept design through detail design and construction. Our expertise in feasibility exploration, machinery and systems design, functional integration, integrated logistics support, acquisition management and life cycle engineering management enables OAK Management to provide fully integrated engineering solutions for complex systems. Our software development capabilities cover the entire software development life-cycle from requirements development through software application deployment and life cycle maintenance.
