FOR IMMEDIATE RELEASE

OAK MANAGEMENT TO SUPPORT THE NAVAL SURFACE WARFARE CENTER, CARDEROCK DIVISION

Alexandria, Virginia – 27 March 2008 – On March 20, 2008 General Dynamics Information Technology, Inc. (GDIT) was awarded a \$5.5M contract for Engineering and Technical Services for Ships Modernization and Technical Advancement.

OAK Management, Inc., as a subcontractor to GDIT, will be supporting the Naval Surface Warfare Center, Carderock Division, in their role as the In-Service Engineering Agent (ISEA), by providing engineering and technical support, training, requirements and interface development, system assessments, grooming, testing, troubleshooting and repair for Damage Control Automation Programs.

OAK Management is a small business focused on supplying clients with innovative solutions in the area of program management, systems engineering, and software development services to the Federal government and commercial clients since 1981. Specific capabilities include mechanical and electrical engineering, naval architecture, software application and database development and associated acquisition program management support. OAK Management's innovative solutions support our clients in engineering disciplines from concept design through detail design and construction.
